What our delegates say

I chose to embark on the Dental Routes course because I believe that implantology is a key skill for today's dental practitioners and I have always been attracted to oral surgery.

The programme is completely independent, so participants get to learn the science rather than limit their understanding to specific implant systems. The highlight for me was placing my first implant, safe in the knowledge that my fantastic mentor was by my side to guide me.

Ajay Menon,
Langley Road Dental Practice

**51hrs
CPD**
